Hi Kerryann,

Tom is out this morning, so I'm hoping I'm not overstepping my bounds, but I'm wondering if you also received the revised public notice?

The letter you've sent references the proposal to impact 25.28 acres for Dark River Seepage, but after reviewing comments from the public notice, US Steel revised the impacts down to 5.75 acres of impact. The Corps sent out a second public notice for the 5.75, which I'm attaching here.

Thank you,
Jen

Tom,
Attached is EPA's comment letter on the Dark River Seepage Collection and Return PN. It was signed yesterday and the hard copy is being sent out today. If you have any questions, let me know.
Thanks,
Kerryann
